Refer to the operator's manual for advance search criteria.

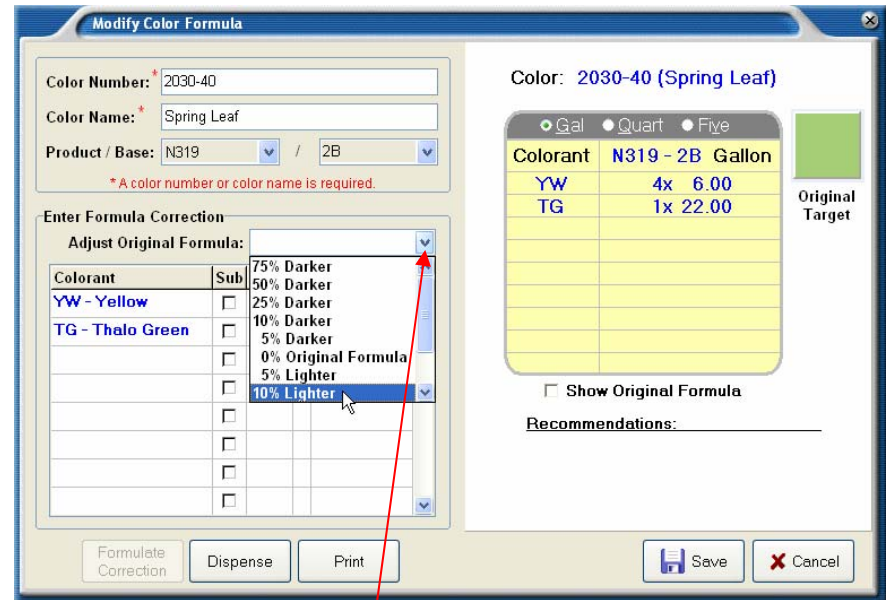

Ladder Series

The Ladder Series feature makes it possible to adjust a displayed prescription, either lighter or darker.

By choosing the Modify Formula button when the desired formula is displayed, you can make the color lighter or darker by 5%, 10%, 25%, 50%, or 75%.

Modify the
current color
formula

Move the pointer to the Adjust Original Formula box and click on the down arrow. Now you can adjust the displayed formula to lighten or darken the color by the desired percentage
